## KEY FINDINGS:

- 118 respondents completed the survey. Representing 16 African countries as Nigeria recorded the highest number of respondents.
- Most of the respondents develop Entertainment Games for Mobile, using Unity.
- 17% of the respondents have attended Africa Game Week, which is the Most Attended Event by the respondents.
- Most of the respondents who are Individuals develop games in their leisure and do not earn from developing games.
- 18 out of the 41 Game Studios have been in operation between 2-5 years and most of the game studios have between 1-5 employees.
- With only 33 respondents having received funding, 20 of which came from Investors.
- Affordable Internet was rated the most critical resource after Electricity. Mobile Network Operators ratings were good, but support from the government has been miserable.
- The respondents are neutral in their view of the African Games Industry in the next 3 years, as funding remains a big support needed for the success of the industry.

## RECOMMENDATIONS:

In order to optimize the data collection process of the survey, here are some few recommendations:

- **Use Selection Tools:** To protect users from entering really dirty data for easier and faster data cleaning and analysis, selection tools like Dropdown, List box, Selection box and others.
- **Reduce User Entries:** Unless needed, do not allow users to enter open data into the question fields. It is better to provide options for them to choose from.
- **Provide Descriptions:** Descriptions serve as guides for the users when answering survey question. It also makes it easier for the users to understand the authors intent and it improves the respondents entry.
